SUMMARY

Recent Software Engineering graduate from Telkom University Surabaya with a 3.75 GPA with hands-on experience in Software Quality Assurance through internships at Minilemon Technology and Fuomo. Experienced in manual testing, test case documentation, bug reporting, and build automated tests using Playwright, I have also done API testing with postman, performance testing with JMeter, and static code analysis with SonarQube to catch defects and vulnerabilities early. I worked with a weekly CI pipeline using AWS as well during my internship at fuomo. I started in web and mobile application development using Laravel and Flutter before moving towards testing, In my spare time I take part in bug bounty programs on Bugcrowd and HackerOne, and I want to keep growing in QA and application security.

EDUCATION

Bachelor of Software Engineering August 2022 – August 2026

Telkom University Surabaya

GPA: 3.75 / 4.00

PROFESSIONAL EXPERIENCE

Quality Assurance Intern July 2026 – October 2026

Fuomo (PT Generasi Pembawa Sukses), Jakarta Selatan, Indonesia (Remote)

Quality assurance for Fuomo, an Indonesian creator platform connecting Creators and Supporters through a coin and digital wallet system, working within a small development team.

Key Achievements:

- ✓ Designed test cases for the Auth module (login, registration, forgot/reset/change password) covering positive, negative, boundary, and security scenarios (SQL injection, XSS, reset-token tampering)
- ✓ Designed 100++ functional test cases for the platform revamp covering authentication, products, orders, payments, wallet, withdrawal, support, wishlist, and dashboard on desktop and mobile
- ✓ Executed 100++ UI/UX test cases across desktop and mobile and surfaced issues through exploratory testing
- ✓ Tested 8 OBS streaming overlay widgets, documenting and verifying 14 issues
- ✓ Developed and maintained automated test using Playwright (TypeScript) for the Creator, Guest, and Supporter role

Technologies used: Playwright, TypeScript, Node.js, Git, Spreadsheets, AWS CodeBuild, AWS EventBridge, Docker, PostgreSQL.

Quality Assurance Intern August 2025 – January 2026

Minilemon Technology, Depok, Jawa Barat, Indonesia (Remote)

Designed and executed comprehensive end-to-end testing strategies for ML-Space, an educational mobile application built with React Native and Expo SDK, implementing a "Learn-first, Play-later" ecosystem for children and parents.

Key Achievements:

- ✓ Executed 55+ functional test cases covering authentication, parent dashboard, and child learning modules
- ✓ Implemented 42 automated unit test using Jest with 100% pass rate
- ✓ Conducted 7 API integration tests via Convex and Postman to validate endpoint integrity
- ✓ Identified and documented 40+ critical bugs during UI/UX redesign phase
- ✓ Performed load testing on 7 endpoints using JMeter

Technologies used: React Native, Expo SDK, NativeWind, Convex, Jest, JMeter, Postman, Huly.

PROJECTS

ML-Space Mobile Application | Minilemon Technology (Internship) August 2025 – January 2026

Role: Quality Assurance

Engineered automated testing suites and performance benchmarks for an educational mobile platform, validating complex cross-platform synchronization and data-driven user workflows.

Technologies used: React Native, Expo SDK, NativeWind, Convex, Jest, JMeter, Postman, Huly.

Mesti Minum Web Application | Academic Project January 2025 – June 2025

Role: Web Tester

Mesti Minum is a web-based drink marketplace platform developed for the academic community at Telkom University Surabaya. The platform enables users to browse, order, and manage drink purchases from various merchants with emphasis on speed, usability, and convenience. I served as the web tester, conducting performance testing, usability testing, black-box testing using a decision table, and white-box testing using PHPUnit. I also wrote detailed test cases and bug reports to ensure system reliability and user satisfaction.

Technologies used: Katalon Studio, PHPUnit, JMeter, SonarCube, Trello.

LogiCA Mobile Application | Academic Project December 2024 – January 2025

Role: UI/UX Designer & Front-end Developer

LogiCA is a mobile-based vehicle maintenance management system designed to simplify logistics operations by improving vehicle service tracking and communication between drivers, mechanics, and administrators. Developed using Agile Scrum methodology. I am responsible as a UX designer and front-end developer.

Technologies used: Flutter, Dart, C++, Swift, HTML, MySQL, Jira.

Buster Web Application | Academic Project August 2024 – November 2024

Role: Full Stack Developer

Buster is a collaborative project developed to simplify the process of purchasing bus tickets. I contributed to both front-end and back-end development. The application emphasizes ease of use, reliability, and responsiveness.
Technologies used: Laravel, Blade, PHP, JavaScript, CSS, Bootstrap, MySQL.
Link to the project: https://github.com/adibfirmannn/buster-growth

Sirekom Web Application | Academic Project January 2024 – June 2024

Role: Full Stack Developer

SIREKOM (Sistem Informasi Registrasi Kompetisi Mahasiswa) is a collaborative project developed to manage student competition registration at Telkom University Surabaya. As a front-end and back-end developer, I am responsible for building key features such as user registration, competition submission, and an admin management interface. This system focuses on competition management and information for students.
Technologies used: Laravel, Blade, PHP, JavaScript, CSS, MySQL, Jira.

ORGANIZATIONAL EXPERIENCES

Head of Venue and Logistics | CODER Tel-U Surabaya January 2024 – November 2024

Led logistics planning and venue operations for various organization events, managing technical setups and equipment procurement. Coordinated team members and internal resources to ensure seamless execution of large-scale event programs.

Head of Public Relations Division | Novitas Aeternum (OSPEK) August 2024 – September 2024

Led public relations for the departmental orientation program (OSPEK). Managed internaland external communications, coordinated media materials, prepared public announcements, and ensuredthe event's image and messaging were consistent and effective.

CERTIFICATIONS

Microsoft Security, Compliance, and Identity Fundamentals Issued April 2024
Microsoft, Kartu Prakerja & Mereka

ADDITIONAL INFORMATION

Languages: Bahasa Indonesia (Native), English (Professional Working Proficiency).
Specialization: Highly interested in Web Application Penetration Testing, ethical hacking, and vulnerability assessments to enhance software security.
Bug Bounty Participant: Actively engaged in security research and responsible vulnerability disclosure on global platforms, including Bugcrowd and HackerOne.
